Training

Interweave Solutions believes that the only way to solve poverty is to "lift where you stand". That is why we so strongly empower individuals that are Success Ambassadors to impact their communities by teaching them the material that they have learned by taking the Masters of Business in the Streets (MBS) Course.

The material in the MBS Course gives individuals the tools they need to be truly self-reliant. It teaches them how to find success in within their home, in their community, and also in their businesses.

This training that we will be doing for 2 days is to strengthen those Success Ambassadors. We will be going over how they can generate their own MBS groups from within their communities, how they facilitate the MBS Course the "Interweave" way, how to help them graduate their students and then most importantly how to maintain those groups for the future.

We will provide lunch on the training days. During the training we will be doing activities to teach principles that instill self-reliance. At the end of the 2 days of training we will hold a graduation ceremony for those that attended and give out certificates. This will be a time of celebration and to take photos with the participants.

Visiting MBS Business

When we travel we like to work with our Success Ambassadors and visit 10-15 of their businesses. This not only allows us to be hands on in their businesses but it also allows us effectively follow up on what was taught to ensure the MBS material is actually still being used.

We look at their income and expense logs, their income statements, and also how they are marketing their businesses. This is also a time to offer feedback on how they can improve their businesses.

This is one of the favorite aspects of the experiences because it allows you to walk the streets of South Africa and truly experience the impact that Interweave Solutions is having.
